

MUHAMMAD SYAHID BIN ABD HALID

Bachelor of Science (Hons.) Mathematics (Data Science)
Kuala Lumpur | 019-3035652
Email: syahidhalid@gmail.com |**LinkedIn:** Muhammad Syahid|**GitHub:** https://github.com/SyahidHalid

PROFESSIONAL SUMMARY

Experienced Data Scientist in Banking Industry possess a strong proficiency in ECL computation. Have expertise in tools and technologies like Python, SAS programming, and Microsoft Power BI for Data Analysis, Reporting, and Automation. My experience spans across areas such as Management Accounts and reporting, Basel III, Capital Adequacy Framework for Islamic banking and MFRS9, enabling me to contribute to regulatory compliance and risk management initiatives. Additionally, I am adept in leveraging Microsoft Azure Machine Learning for advanced analytics, with a focus on sustainability and net-zero carbon emissions goals. I am also experienced in data validation, databases, and reporting tools like Jaspersoft.

EDUCATION

Feb 2019 — Jan 2021 — **Bachelor of Science (Hons.) Mathematics, Universiti Teknologi MARA (UiTM)** — Shah Alam
Dean's Award: Two consecutive semesters

Jun 2016 — Jan 2019 — **Diploma in Mathematical Sciences, Universiti Teknologi MARA (UiTM)** — Arau
Vice Chancellor's and Dean's Award: Five consecutive semesters

SKILLS & COMPETENCIES

TECHNICAL SKILLS	**Jaspersoft**	**Python - Visual Code**	**GitHub**
	Power BI	**SQL - Teradata & Oracle**	**SAS Drive**
	Tableau	**SAP**	**Microsoft Azure**
COMPETENCIES	**Data Automation**	**Monitoring & Report Generation**	**Process Improvement**
	Machine Learning	**Balance Sheet & Income Statement**	**Due Diligence**
	BI Dashboards	**ECL 1,2,3 & Risk Control**	**Reconciliation**

CERTIFICATIONS

2025	**PL-300 – Microsoft Power BI Data Analyst Training**
2024	**Microsoft Certified – Azure Data Scientist Associate**
2024	**Microsoft – Design and Implement Data Science Solution on Azure**
2024	**MIA – MFRS17 Insurance Contracts & Accounting Entries**
2022	**AICB – Ethics in Banking**
2021	**SAS Global Certification – Certified Programming SAS 9.4**
2021	**SHRDC – Big Data Analytics Programming: Excel, Python, R & SQL**
2020	**IBFIM – Takaful Basic Examination**
2020	**PNB – Modul 101 (A) Asas Perancangan Kewangan**

WORKING EXPERIENCE

Aug 2023 – Present

Data Scientist & Business Intelligence, IT Application Development
Export Import Bank of Malaysia Berhad

Achievement: Establish data processing automation generating overall bank's system information for reporting and implement supervised machine learning monitoring and reports (Loan Growth Model against Macroeconomic factors and Customer Churn Prediction Criteria Model) as well interactive reporting dashboard.

Job Scope:

- **PMO:** Facilitate stakeholder service and change requests through the appropriate channels, including the Change Management Committee and escalation to the Board. Ensure MCPID compliance, monitor project progress, and maintain the defect tracker.
- **BI Dashboards:** Utilize historical data to create suitable visualization and business intelligence of products and segmentations using an interactive dashboard for interactive exploration, real time updates and data-driven decision making.

- **ETL & Data Automation:** Extract, transform and load data to Integrate BNM, CCRIS and MIS reporting from data warehouse with reliable and less error-prone automation.
- **ECL Computation:** Provide ECL analysis, loan deficiency and computation for each account of Active, Watchlist and Impaired customers.
- **Carbon Emissions:** Establish the bank's Scope 1 and Scope 2 Carbon Emissions calculation of company's car and utility bills.
- **Management Accounts:** Prepare closing and analysis month end income statement and balance sheet in financial statement closing process for accounting operation.
- **Data Analytics:** Provide ad hoc research and analytical assistance (Customer's cycle, sectoral, rating) for HOD's decision making to manage strategic support to HOD in continuous review of the Bank's Projects (Core Banking System, Corporate Strategic Plan, E-invoices Implementation, Malaysian Global Connect, GHG e-missions, Additionality Assessment).
- **Data Governance:** Ensuring compliance support of data privacy and regulation as well of data quality & validation monitoring by implementing policies, control data lineage, access control and audit trails.
- **Continuous Development:** Explore new areas of MIS and **d**evelop process improvement to increase efficiency and worked with application tech team to achieve consistent data flows and minimize on cost investment technology platform.

Nov 2021 — Aug 2023 **Risk Data Analyst, Credit Risk Management**
Maybank Islamic Berhad

Achievement: Effectively yield significant cost savings for the department by transition current data analytics and processing from SAS to Python and Establish data processing automation generating overall credit risk performance for reporting.

Job Scope:

- **ECL Computation:** Provide ECL analysis, loan deficiency and computation for each account of Active, Early Warning Signal, Watchlist, Special Mention Account and Impaired customers.
- **Report Generation:** Generate and consolidate multiple monthly, quarterly and yearly reports for various sources (House Financing, OD, investment, trade, FCL, Car Financing, Unit Trust and Credit Cards of Corporate and Non-Corporate Customers) using SAS and Python.
- **Portfolio Reporting:** Report and monitor credit risk portfolio, adverse portfolio criteria, investment account allocation and restricted profit-sharing investment account from overall and respective line of business by its outstanding before and after unwinding, impaired ratio and ECL to support in decision making in EXCO, ALCO and BRC.
- **Migration Reporting:** Identify and investigate deteriorating customer rating and MRFS staging to assess the bank's asset quality on the customers' credit performance, management risk review and board overview.
- **Limit Monitoring:** Monitor the bank's high-risk sector (Construction, Palm Oil, Oil & Gas and Shipping) limit and single counterparty exposure limit to provide recommendations for diversification, concentration risk and diversification, mitigating risk and maintaining adequate capital buffers.
- **BNM Reporting:** Provide climate change and principle-based taxonomy mitigation report and overall asset financing position report to bank negara, this includes and ad-hoc requested by BNM.
- **BI Dashboards:** Utilize historical data to create suitable visualization and business intelligence of products and segmentations using an interactive dashboard for interactive exploration, real time updates and data-driven decision making.
- **Data Integration:** Develop and maintain ETL processes to integrate data from various sources into databases while resolving data integration issues to provide report and insight for stakeholders.
- **Data Pipeline Management:** Optimize data pipeline performance as well as ensure data consistency throughout the pipeline and design data pipelines that support real-time data ingestion and processing.
- **Cross Functional Collaboration:** Collaborate with business stakeholders and software engineers to ensure data integration and reporting requirements are incorporated into

software development projects.

Jan 2021 — Sep 2021

Data Process Engineer, Quality Assurance
Elentec Malaysia Sdn Bhd

Achievement: Establish excel template automation for reject reporting against total manufactured product and establish product manufactured prediction model against purchasing order incoming material.

Job Scope:

- **Quality Control:** Manage and coordinate manpower in executing production reject system to collect production and quality data of finished goods.
- **Data Structure:** Implement data collection structure for pre-built reporting and interface with line manager for gathering requirements while delivering report solution of quality and production performance.
- **Special Project:** Part of special taskforce as traceability team to assure trace of defective devices in the manufacturing flow when receiving queries from suppliers or customers.
- **Presentation Materials:** Assisted in the preparation of management presentation materials.
- **Production Pipeline:** Manage incoming material with accurate specific for production, troubleshoot inline process devices and outgoing inspection finished product.
- **Performance Monitoring:** Enhance and optimize product's function using statistical process control, perform failure mode effect analysis and root cause analysis of man, machine method and material to control rejects, making corrective plan and preventive actions.
